EDUCATION

- KL Deemed To Be University** Hyderabad, India
 - Bachelor of Technology – Computer Science and Information Technology; CGPA: 9.94* *July 2023 – Present*
 - Relevant Coursework:** Operating Systems, Data Structures and Algorithms, Artificial Intelligence, Machine Learning, Computer Networks, DBMS, Cloud and Serverless Computing, Advanced Operating Systems, CI/CD

TECHNICAL SKILLS

- Languages:** Java, Python, C, SQL, JavaScript
- GenAI/AI Tools:** LLMs, LangChain, RAG Pipelines, Gemini API, OpenAI API, Prompt Engineering
- Backend Development:** FastAPI, Flask, REST APIs, Authentication & Authorization, JWT, API Integration
- Core Areas:** Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, System Design, DevOps Fundamentals, Agile Development, CI/CD Practices
- Web Development:** React.js, Node.js, HTML, CSS, JavaScript
- Cloud & Other Tools:** AWS (Lambda, S3, EC2, RDS), Docker, Jenkins, Git, GitHub, Bash (Automation Scripting), Linux, Microsoft Excel, PowerPoint, Word

EXPERIENCE

- Associate Software Engineer Intern, Accenture** May 2026 - Present
 - Completed onboarding, orientation, and initial corporate training programs.
 - Gaining knowledge in software engineering practices, enterprise workflows, and collaborative development environments.
 - Currently undergoing technical learning and project readiness training.

- Intern Trainee, Tech Mahindra** May 2025 - July 2025
 - Developed a Flask-based ML application and integrated it with REST APIs for real-time prediction workflows.
 - Designed modular backend services, improving scalability, maintainability, and code quality.
 - Collaborated with ML team to collect and preprocess datasets (Kaggle) for model development and deployment.

PROJECTS

- Production Incident Auto-Recovery System — AWS, DevOps**
 - Designed a fault-tolerant, event-driven system using AWS Lambda and Step Functions to automate recovery workflows with retry and rollback mechanisms, ensuring high availability.
 - Used AWS SSM Run Command to diagnose and remediate server issues, reducing manual effort and improving MTTR; integrated Amazon SNS for real-time alerts.
- Blockchain-Based Healthcare Consent Management System - Hedera Hashgraph, Solidity - Live (Testnet)**
 - Built a decentralized healthcare consent platform on Hedera ensuring secure and tamper-proof data sharing.
 - Developed smart contract-based access control for real-time consent management with auditability.
 - Applied cryptographic techniques to ensure data integrity and enable secure, scalable data exchange.
- EmpowerHer - AI Platform for Female Entrepreneurs - React.js, Node.js, Gemini API, LangChain**
 - Collaborated in a team to build a multi-turn RAG system using Gemini API and LangChain for business plan generation. Developed backend APIs using FastAPI and integrated AI workflows for scalable request handling.
 - Contributed to prompt engineering pipelines to handle diverse inputs and generate consistent structured outputs.
 - Worked on developing a scalable full-stack application using React.js, Node.js, and MongoDB. Tested and debugged backend APIs to improve reliability and deployment readiness.

COMPETITIVE PROGRAMMING

- Solved 400+ DSA problems** across LeetCode , HackerRank , and Codeforces
- LeetCode Rating: 1628 (Top 19%)
- Codeforces Rating: 1092

CERTIFICATIONS

- Machine Learning with Python — Cognitive Class.ai** (Score: 91%)
- AWS Solution Architect (Associate)
- AWS Cloud Practitioner

HONORS & AWARDS

- Academic Excellence Award — 10/10 CGPA** in 1st Semester
- Ranked 2151** out of 100,000+ participants in TCS CodeVita S12 — Nov 2024
- 2nd Prize at Codestorm'24 Hackathon — Oct 2024**
- Top 5 finalist, GenAI GenderTech Hackathon– Amrita University** (January 2025)
